

# DO EVERYTHING to PROTECT your CUSTOMERS...

## GENUINE LAMPS GUARANTEE:

- VIQUA provides its equipment with complete safety certifications and warranty for its components. Using genuine lamps ensures the maintenance of your system's warranty. VIQUA cannot warranty any system component if non-genuine lamps are used.
- VIQUA systems are third-party validated ensuring effective output and disinfection. Tested and proven system performance ensures disinfection is always achieved.
- **Safety certified.** Replacement with any other lamp **voids** NSF 55 and UL/CSA/CE certification and compromises safe lamp performance. Using non-genuine lamps results in electrical code no longer being met and safety is at risk.
- VIQUA lamps are LongLife coated for stability, longer life and increased efficiency. Even lamps that look the same will not perform the same.

TROJAN **UV**MAX™

A typical *Regular and High-Output lamp*, used in selected TrojanUVMax products, can be easily identified by our TrojanUVMax branding.

A typical *Amalgam lamp*, used in selected TrojanUVMax products, can be easily identified by our TrojanUVMax branding.

## get genuine

### BUILDING WATER CONFIDENCE

Each component of your VIQUA system has been designed and developed through extensive research and development to be part of an overall system that operates safely and efficiently over its entire lifetime.

**Ensure the performance, safety and warranty of your TrojanUVMax system.... request genuine lamps.**
